

## PRESS RELEASE

### ESI SIGNS AGRIVOLTAIC SYSTEMS CONSTRUCTION CONTRACTS FOR AROUND 5.5 MILLION

**Rome, 4 March 2026** – ESI S.p.A., an Italian company active in the renewable energy market, operating as an EPC (Engineering, Procurement and Construction) and System Integrator in Italy and abroad, listed on Euronext Growth Milan (“EGM”), a multilateral trading facility organized and managed by Borsa Italiana S.p.A. (“the Company”), announces that it has entered into contracts for the construction of agrivoltaic plants located in the Umbria region, with a total installed capacity of approximately 15 MWp.

The contracts, with a total value of approximately €5.5 million, provide ESI S.p.A. to carry out all activities, services and works required for the design, construction and commissioning of plants with a total capacity of approximately 15 MWp.

The project involves the development of next-generation agrivoltaic plants, designed to combine the production of renewable energy with the continuation of agricultural activities, in full respect of the environmental and landscape context, thereby making a tangible contribution to decarbonisation and sustainable development objectives.

The award of these contracts strengthens the Company’s presence in the Italian renewable energy market, supporting the increase of national photovoltaic capacity and making a concrete contribution to the country’s energy transition objectives.

Considering the production achieved as at 30 June 2025, together with the new projects secured during the second half of 2025 and those entered into up to the date of this press release, the Company has reached a total backlog of approximately €33 million, demonstrating a stable, significant and continuously growing order book.

**Stefano Plocco**, CEO of ESI S.p.A., stated:

“The acquisition of this new contract marks a further step forward in the Company’s growth path and confirms our ability to operate with high technical and organisational standards in a market undergoing profound transformation.

Our involvement in an agrivoltaic project strengthens our role within the renewable energy value chain and enhances the know-how we have developed in delivering integrated, high-technology solutions.

We will continue to focus on execution excellence, operational efficiency and the strengthening of our commercial pipeline, with the aim of supporting solid and progressive growth over the medium to long term.”

*ESI S.p.A. (Energy System Integrator) is an Italian company active in the renewable energy market, operating as an EPC (Engineering, Procurement and Construction) and System Integrator, able to oversee the entire value chain and develop turnkey solutions for complex energy projects of all sizes: from project study, to engineering, to the executive implementation of the plant, with a constant eye on financial sustainability.*

*ESI is active, as EPC, in the segments of photovoltaic, wind, off-grid, mini-grid (electricity supply in remote areas), and hybrid systems for the construction, in any environmental context, of large-scale photovoltaic plants and power stations (wind farms), which increasingly require sophisticated construction technologies.*

*As a System Integrator, ESI is able to make different BESS (Battery, Energy, Storage, and System) systems communicate with each other with the aim of creating a functional structure that fully exploits the potential of power stations, generating additional efficiencies for the entire energy system.*

*ESI is also the main Italian operator specialized in the revamping of large-scale traditional photovoltaic systems. The Company operates in Italy and in international markets, directly or through subsidiaries, serving public and private clients (foreign governments, investment funds and NGOs, renewable energy multinationals).*
