

PRESS RELEASE

ESI SIGNS THREE CONTRACTS FOR THE REVAMPING AND TECHNOLOGICAL UPGRADING OF PHOTOVOLTAIC PLANTS WITH A TOTAL CAPACITY OF 2.4 MWp

Rome, 27 August 2026 – ESI S.p.A., an Italian company active in the renewable energy market, operating as an EPC (Engineering, Procurement and Construction) and System Integrator in Italy and abroad, listed on Euronext Growth Milan ("EGM"), a multilateral trading facility organized and managed by Borsa Italiana S.p.A. ("the Company"), announces that it has signed three turnkey contracts for the revamping and technological upgrading of photovoltaic plants located in Puglia, in the Municipality of Brindisi, with a total capacity of approximately 2.4 MWp.

The contracts, with a total value of approximately €0.65 million, provide for the design, execution and turnkey delivery of the technological upgrading works for three photovoltaic plants: "SOL080" (approx. 0.51 MWp), "069GEO" (approx. 0.93 MWp) and "082GEO" (approx. 0.93 MWp). The works are aimed at restoring the plants' full production capacity and improving their efficiency. Completion of the works is expected by 31 December 2026.

The award of these contracts further consolidates ESI's positioning among the leading Italian operators specialised in the revamping of photovoltaic plants, contributing to the streamlining of the national photovoltaic portfolio and, more broadly, to the country's energy transition path.

Taking into account the production output recorded as of 31 December 2025 and the new projects secured up to the date of this press release, the Company's total backlog stands at approximately €33 million, further confirming the strength of its order book and the continued momentum of its commercial growth.

Stefano Plocco, Managing Director of ESI S.p.A., stated:

"Securing these new contracts reinforces ESI's growth trajectory and highlights the value of our expertise in revamping—a strategic segment for us with highly promising prospects. We remain focused on strengthening our capabilities and pursuing new opportunities to drive solid, sustainable long-term growth".

ESI S.p.A. (Energy System Integrator) is an Italian company active in the renewable energy market, operating as an EPC (Engineering, Procurement and Construction) and System Integrator, able to oversee the entire value chain and develop turnkey solutions for complex energy projects of all sizes: from project study, to engineering, to the executive implementation of the plant, with a constant eye on financial sustainability.

ESI is active, as EPC, in the segments of photovoltaic, wind, off-grid, mini-grid (electricity supply in remote areas), and hybrid systems for the construction, in any environmental context, of large-scale photovoltaic plants and power stations (wind farms), which increasingly require sophisticated construction technologies.

As a System Integrator, ESI is able to make different BESS (Battery, Energy, Storage, and System) systems communicate with each other with the aim of creating a functional structure that fully exploits the potential of power stations, generating additional efficiencies for the entire energy system.

ESI is also the main Italian operator specialized in the revamping of large-scale traditional photovoltaic systems. The Company operates in Italy and in international markets, directly or through subsidiaries, serving public and private clients (foreign governments, investment funds and NGOs, renewable energy multinationals).
